ON A SERIOUS CHARGE.

Two Boys Arrested for Assaulting a Young Girl.

SANTA ANA, May 19.— [Special.]
Two boys, named Almer and Joseph Clapp, aged 15 and 14 years respectively, were brought from Arch Beach to this city today, under agent to this city today, under arrest, charged with the crime of rape upon. Huntington's Efforts to Gain Control the person of Miss Ida Brooks, aged 16. The arrest was made on com-

plaint of the girl's father.

The boys do not deny the charge, but aver that the act was committed at the solicitation and request of the girl, who is older than either of the boys, and turns the scales at 160 pounds, while neither of the boys weighs over 115 pounds. If the boys are to be believed, the wrong party is acting as complaining witness, a reversal of parties defendant being in order. The case will be examined to-

THE FRUIT UNION.

Two Prominent Members Leave the Organization.

SACRAMENTO, May 19.—[By the Asaciated Press.] President P. E. Platt and E. J. Gregory, directors and members of the executive committee of the California Fruit Union, have resigned and withdrawn from the union. They give as a reason that the machinery of union was not a practical method for handling California fruits. They want to encourage eastern dealers to apread California fruit over the country, and say this cannot be done if dealers are obliged to pay tribute to some fruit union which seeks to control or regulate their disposition.

The Prisoner Tells the Story of th Tragedy-Those Circulars Again for the Defense.

By Telegraph to The Times. SAN FRANCISCO, May 19.—[By the Associated Press.] When the trial of D. H. Arnold was resumed this morning, the defendant again took the stand, and related the details of the tragedy. He said that on the day when the shooting occurred he met Garness on Market street, and told him he wanted to talk to him. They accordingly went into the Peerless saloon and into a back room, where they ordered drinks. Witness said he ac-cused Garness of writing the circulars which reflected upon Mrs. Arnold's character, Garness jumped to his feet and cremimed: "Well, suppose I did to the company of the about 112"

w. N. Hart, a newspaper reporter, testified that a few nights before the shooting he met Garness and warned him that he was acting foolishly toward Arnold. Garness displayed a revolver and said he was prepared for Arnold.

Arnold.

A number of prominent citizens of Colusa testified to Arnold's good reputation and said they had received copies of the circular last fall. They also said they noticed a marked change in Arnold's conduct after the circulars made their appearance, and several witnesses thought he was on the verge of losing his mind.

Frank Cannon, editor of the Ogden Standard, in opposition to Mr. Cullom's bill to amend the Tucker-Edumunds act, so as to disfranchise the Mormons and render them ineligible as jurors. Another Cyclone In Ohlo-It Cause Sheep Killed by Im-mense Hallstones.

By Telegraph to The Times.

NEW YORK, May 19 .- [By the Asso ciated Press.] Henry Villard, according to a morning paper, denies the rumor that he has joined hands with Huntington to obtain control of the Pacific Mail Steamship Company and cause George Gould to retire from the presidency.

George Gould also denies the story. and says that while Huntington is doing his best to obtain control of the company at the coming election, Villard is not in league with him. Gould also states that the story that Huntington acquired 80,000 shares of stock is probably untrue. At any rate it is doubtful whether Huntington can obtain the desired control. Should he succeed, Gould will imme-

diately resign the presidency.

Gould also states that he did not think Huntington's management would be beneficial to the steamship company, as his interest in Southern and Central Paside Builtonia. as his interest in Southern and Central Pacific Railroads would tend to make him sacrifice the interests of the steamship company to those of railroads. Gould declared that, should Huntington be successful, the Goulds will immediately dump their entire block of stock on the market.

GIBSON VS. FISHER. Judge Wade yesterday decided the case of William Gibson vs. C. L. Fisher, in favor of the plaintiff, fixing Fisher, in favor of the plaintiff, fixing the damages at \$1. The suit was brought by the plaintiff to recover \$10,000 damages. He alleged that he purchased the good will of Fisher's boot and shoe business, on the agreement that Fisher would not enter into the same business for a year. A partnership was entered into, however, by the defendant, and their business was only a short distance away from the old stand. After some time the competition thus brought about proved too much for Mr. Gibson, and he brought suit for damages.

Judge Wade, in his decision, said that there was no mention in the agreement of the value of the good will of Mr. Fisher's business, and it was intimated that had there been a definite amount fixed the damages would have been arranged accordingly.

The party remained there about an hour and looked over the harbor. Mr. Huntington soon convinced Dr. Widney, who acted as spokesman and general adviser for the Chamber of Commerce, that he is well posted on the harbor and its importance to both the railroad company and Southern California. Mr. Huntington during his visit here two years ago made a thorough investigation of the harbor, and since that time he has examined all the surveys, and has insisted from time to time that the matter of appropriations be pashed in Congress by the representatives from California. It is understood that he and Mr. Stanford had more than one quarrel about this same harbor, but every time Mr. Stanford wriggled out of the hole by saying that he was successfully opposed by Senators Jones of Nevada and Dolph of Oregon, who have been fighting for Redondo Beach people are the best of friends, and he and Senator Jones have entered into some kind of combination, so the story goes. This excuse of Mr. Stanford's may have gone down with the present president of the Southers Pacific, but it is more than probable that he has had an idea that the heavy-weight Senator was working all the time for his pet harbor, but private citizens and corporations cannot improve it. The Government must do that, and I am as anyious as any of the people in Los Angeles, to see it improved. Santa Monica and Redondo can never be anything more than roadsteads, but we will improve Santa Monica."

The other railroad men present indulged in a few quiet jokes at the expense of the little officer, and he stole away, looking ashamed of himself.

IN A SHORT TALK with a TIMES representative, shortly before leaving for San Diego, Mr. Huntington showed very plainly that he is not at all pleased with the manner in which Mr. Stanford has conducted the business of the company in Southern California. His company got a foothold here twenty years ago, and should have had their pick, but through political jobbery and mismanagement they have lost many grand opportunities not only to benefit themselves but also the whole country. One or two instances will do to illustrate these blunders: Through bad management they threw away waterfront rights at San Pedro, which they have had to recapture at a cost of from \$250,000 to \$500,000, and in the same manner they lost the First-street property, which was snapped up by the Santa Fé Company, and they were compelled to locate their depot four blocks further out than where it should be.

First Vice-President Fred Crocker is of the same opinion regarding San Pedro. He holds that something must be done at Santa Monica at once to hold the trade that is now going further south.

Dr. King, the eminent medical writer, in a learned disquisition on our national complaint, constipation, says:—

The great quantity of cathartic pills, etc., which are annually swallowed by the people of this country has been productive of immensely more mischief than is generally suspected. True, the physic unloads the bowels, but in so doing its action tends to diminish the tone of the intestines; so that, instead of removing the costiveness, it aggravates it, leaving the bowels in a more torpid condition.

table laxative, that, owned and considerable simulating properties, is so certain a relief in constipation that it has been given away to hundreds, not to be paid for unless it was of positive benefit. It replaces constipation almost immediately with a natural easy habit, and is so mild that, unlike drastic purgatives, it can be taken indefinitely with perfect freedom and sately.

It will soon be necessary to confine the sale of kerosene to drug stores, and require a doctor's certifi-cate from every purchaser.

THE New Orleans Picayune a few days ago published an article advocating the acceptance by the State of the bribe offered by the Louisiana State Lottery Company for the privilege of renewing its franchise. The New Or-leans Christian Advocate claims that the secret of the attitude of the press of that city on the lottery question is to be found in the fact that the lottery men have purchased newspaper stock. and are now owners and controllers of at least two of the leading papers. In the cases of other papers, the lottery advertisements, amounting to thousands of dollars, constitute too rich a sop to quarrel with. This, if true, is only one more reason why so gigantic a confidence game should be downed.

Gov. Waterman can do it if he likes, but it he reenters the race as a candidate for the gubernatorial nomination, he will do an unspeakably foolish thing—a thing that will recoil upon his head, prove a hollow mockery, "a d—d barren ideality," as old Bill Allen would say, and result in humiliation and defeat. He must know in advance that he cannot succeed—there is no hope of that, and so his thrusting himself into the arena again can only be "rise Cain" and "get even" with people who have incurred his displeasure by not looking with favor upon his original candidature. MR. HUNTINGTON'S VIEWS.

Mr. Huntington yesterday spent a busy day, inspecting San Pedro harbor and driving around Los Angeles. He expressed astonisment at the improvements which have been made in this

city during the past two years. In regard to San Pedro, Mr. Hunt-ington stated that, while they would mprove Santa Monica, San Pedro is the only proper place down here for a leep-water harbor, but added the very true remark that private citizens and corporations cannot improve it. It must be done by the Government, and Mr. Huntington said he was as anxious as any of the people in Los Angeles to see it imroved. He showed that, in view of our comparatively small population, it was a difficult job to push appropriations through Congress, and said we must send men of brains and force

hard fighters—to Washington.

Mr. Huntington did not hes itate thought that he is not at all pleased with Southern California. He charged this mismanagement to political jobbery, and reiterated that the company is now out of politics for good.

Many of the newspapers of the State have expressed much doubt as to whether the Southern Pacific Company would really go out of politics, in accordance with the declaration of President Hustington. In view of the peatedly emphasized his statement, i would now be both unreasonable and insulting to Mr. Huntington to believe that he means less than what he has said, unless we should be forced to an opposite conclusion by the course of events. In confining its influence

A. T. STEWART.

Many unkind things have been said of late in the New York papers about the late A. T. Stewart. Perhaps some of them may be true, but there was surely more good than evil in a manan alien by birth-who held such sentiments as those which he expressed in the following letter, written by him in 1861 to a customer at Memphis, who had inquired whether Stewart had offered the Government a million dollars to carry on the war, at the same time informing him that no more debts would be paid him:

would be paid him:

The intention not to pay seems to be nearly universal in the South, aggravated in your case by the assurance that it does not arise from inability; but whatever may be your determination, or that of others at the South, it shall not alter my course. All that I have of wealth or position I owe to the free institutions of the United States, under which, in common with all others, North and South, protection to life, liberty, and property has been enjoyed in the fullest manner. The Government to which these biessings are due calls on her citizens to protect the capital of the Union from threatened assault, and, although the offer to protect the especial of the binon from threat-ened assault, and, although the offer to which you refer has not been made by me. I yet dedicate all that I have, as I will, if need be, my life, to the service of the country—for to that country I am bound by the strongest ties of affection and duty.

The memory of a man who expressed

such noble sentiments as these should not only be allowed to rest in peace, but it should be embalmed in the hearts of his countrymen.

THE FIRST-STREET GRADE-SOME

The City Council yesterday ap-proved the report of the Board of Public Works. This report included a recommendation that the 1-in-20 grade be adopted for the opening of First street. The matter now goes to the City Engineer, who will prepare an ordinance for publication. Some residents on the close-in hills met on Saturday and formed an organization to be called the Central Improvement and Protective Association. The mineral substances which stood to have been the defeat of the 1-in-20 project, in favor of an easier grade. A series of rather sensational

Of course, they have it in their power to temporarily delay, in the courts, action upon this mecessary measure, but the improve-ment is so generally demanded by these most nearly interested that we do not believe that their opposi-tion will win finally. It might be well for these gentlemen to reflect a little and consider whether it is a wise or graceful act on their part, for a few wealthy citizens to interpose an obsta-cle in the way of a public improvement which is loudly demanded by a large number of citizens, and the very commencement of which would have a the city. It is also a question whether improvement of business would not

In the Senate yesterday Mr. Dolph spoke on the silver bill. He favored the plan proposed by the Secretary of the Treasury, and argued against the free coinage of silver, unless under an international agreement. Mr. Teller criticised his speech, insisting that the proposition which came from the Finance Committee did not mean silver at all; on the contrary, it means a single gold standard. Mr. Mitchell also dissented from his colleague, Mr. Dolph, and denied that that gentleman voiced the sentiment of Oregon, calling attention to the fact that the against the day of wrath. But who can tell where he will be led and to what fatal lengths he may not go? two State conventions which recently met in that State each resolved unanimously, without any hesitation or mously, without any hesitation or equivocation, that they were in favor parently growing stronger in Congress, under the powerful arguments which have been made by western Senators. It looks almost as if a free-coinage bill might be passed at this session, were it not for fear of the President's veto

> The proposed shortening of time on the Santa Fé to three days between Los Angeles and Chicago, and conse-quently to four days between this city and New York, will bring us very close to the Atlantic seaboard. Moreover it will give us a great advantage in this respect over San Francisco. It is true that fourteen years ago a train was run from New York to San Francisco, over the Central Pacific, in three days and a half, but the very heavy grades on that route forbid the estab-lishment of any such time as a regular thing. Los Angeles will soon begin to realize the great advantages which Nature has bestowed upon Southern California in its low mountain passes We have, in these low passes free from snow at all seasons of the year, an inducement for the entry of competing lines which railroad men can fully appreciate.

California Oranges in Boston, [San Bernardino Index.]

Simeon Cook of Redlands has two and a half acres of seedling oranges, from which he soid 400 boxes at \$1.60 per box on the tree—a total of \$6.40; an average of \$256 an acre. Also two and a half acres of Washington Navels which yelded 300 boxes that sold at a price that netted \$3.50 a box on the tree—a total of \$1050, or \$420 an acre. The seedling trees were six years in orchard. The Navel oranges were shipped to Boston as an experiment. In twelve days from the time of ships ment Mr. Cook got a dispatch that the fruit was sold at a figure that netted him \$3.50 per box on the tree, and asking for another carload, which was shipped, and then a third carload was shipped with equally good results. This settles the practicability of occupying the Atlantic seaboard market with California oranges in competition with fruit from Florida and the Mediterranean district.

Smith made a decidedly good showing against the big colored man, standing up for five rounds without suffering a knockout. By Telegraph to The Times.

WASHINGTON (D. C.), May 19.—[By the Associated Press.] Senate.-Mr. Hale from the Committee on Appropriations reported back the annual Naval Appropriation Bill.

The Silver Bill was taken up, and Mr. Dolph addressed the Senate. He thought international bi-metallism was desirable. In considering the various plans proposed he was satisfied that the one proposed by the Secretary of the Treasury was open to less and fewer objections than any of the others. if the purpose was to keep both gold and silver coin in circulation. He argued against the free coinage of silver as something that would stop the coinage of gold, but remarked that what he said in regard to free coinage did not, of course, apply to free coinage under an international agreement establishing the ratio between gold and

at the close of Mr. Dolph's speech, Mr. Teller criticised it and said that it would not do for that Senator or any other Senator to say with unction-that he was for a double standard or for silver and then favor measures which were absolutely destructive of silver as money. He did not propose that a country should be deceived into believing that the proposition which came from the Finance Committee meant silver at all; on the contrary it meant a single gold standard.

Mr. Mitchell expressed dissent from the views expressed by his colleague (Mr. Dolph), saying in part: "The two state conventions that recently met in Oregon each resolved unanimously, without any hesitation or equivocation, that they were in favor of the free and unlimited coinage of silver. I believe each of those conventions was composed of representative men of the respective parties of our State. I believe in adopting these resolutions. They voice the sentiment almost universally of the people of Oregon. Therefore, I do not desire it to go out that my colleague's speech on this question voices the whole sentiment of Oregon so far as representation of that State is concerned on this floor.

Mr. Wilson then said he had no further statement to make, and the subject was dropped.

The House then in committee of the whole proceeded to consideration of the tariff bill, the pending amendment being that offered by Mr. Funston of Kansas, striking from the metal schedule the proviso that silver ore and all other ores containing lead shall pay a duty of 11 cents a pound on lead contained therein.

and reducing the bond of cigar manufacturers from \$500 to \$100.

Mr. Henderson of Iowa spoke in favor of restoring the present internal tax on tobacco, and offered an amendment to that effect. The people believe, he said, that this tax is the last which should be taken from their shoulders. They preferred that the tax be taken from the necessaries of the table, rather than from the pipe, cigar and whisky-jug. The main question before the House was whether the treasury contained enough money to pay the expenses of the Government. At such a time, he did not believe in taking the tax from tobacco. He did not propose, with

In favor of the United States. The Court affirms the judgment.

The case grows out of the Edmunds anti-polygamy law which dissolved the Mormon Church corporation and escheated to the United States the real estate owned by the church. The Mormons entered suit to have the law declared unconstitutional on the ground that Congress, by ordering dissolution, assumed judicial powers, that the act of the legislative assembly of Utah incorporating the church constituted a contract which could not be impaired by Congress under its authority to repeal Territorial enactments; that the doctrine of escheat was alien to the spirit of free institutions.

On the part of the United States it was contended that Congress had authority to repeal all the Territorial enactments; that the act incorporating the church was invalid, as the attempt to establish the religion was contrary to the provisions of the Constitution; that the charter should be annulled for abuse of granted rights. MR. KINNEY LECTURES

On the Australian Ballot System.

OUR PRESENT SYSTEM DEFICIENT

Wealth the Standard of Succe Taxes Termed Exorbitant—The Australian System Very Strongly Urged.

Abbot Kinney lectured yesterday evening before the Nationalist club in the Universalist Church on the "Australian Ballot System." There was a good-sized audience present, and the remarks of the speaker were attentively

After a few introductory remarks the speaker briefly referred to the rise and fall of nations and their correding needs. In the early history sponding needs. In the early history of this nation our present political system was satisfactory in that it met the requirements of the age. Time has wrought many changes, and the system that worked so well a century ago was spoken of as now sadly deficient. Emigration, the rapid growth of great cities, and the greed of gain were referred to as some of the primary causes that necessitate the adoption of a new system. Wealth, the speaker said, is now the standard of success. The present tax system was sized up said, is now the standard of success. The present tax system was sized up as exorbitant as illustrated by the following figures: In 15 of our largest cities during the past 15 years, the population has increased 70 per cent; the tax valuation, 157 per cent; the amount of their indebtedness, 270 per cent, while the amount of the taxation increased 858 per cent.

amount of their indebtedness. 270 per cent., while the amount of the taxation increased 363 per cent.

Various forms of political bribery and extortion were mentioned and the pressing demand for a remedy urged. This, Mr. Kinney said, is to be found in the Australian ballot system, which he then proceeded to detail, the facts given being taken for the most part from his recent publication on this subject.

This system, in brief, provides that all ballots for State, town or city elections shall be printed and distributed by the State; that nominations for office may be made by convention of parties, as at present, or by a nominating paper, signed by one thousand voters, for State offices, and for minor offices differing in numbers down to a minimum of fifty voters; that all names of candidates for office be printed on the same ballot. Thus all stand exactly allke before the voter, who must make his own choice between them, and make his mark opposite those he favors. his own choice between them, and make his mark opposite those he favors. The blind or illiterate may receive assistance from the election of ficers. A certain time before the election a printed list of the candidates and the offices for which they are named must be posted in every voting precinct, together with cards of instructions to voters.

The benefits resulting from these several provisions were explained at length, and reference was made to the success attending its adoption in this tating that as the Australian lady-buz came here and practically obliterated the various scale pests, so will the Aus-tralian ballot system, if adopted, do away with much of the corruption that infests our present system. The dis-course was eloquent and forcible throughout.

WHITHER ARE WE DRIFTING?"

"Very Wicked City"—A Trombone Windfall.
The wind blew strong from the Trombone quarter yesterday. The Pasadena column, among other starting details, contained the following:

"There appears to be a good deal of devilment going on in Pasadena of one sort and other. One would scarcely think it such a highly literary, classical, religious and morally good city. Reference is made to some of the vices company to frontler tower. he vices common to frontier towns. Since the resignation of Deputy Clerk Marsh, the entire work of the department will be conducted by City Clerk Cambell.

The tennis players were out yesterday. Some of them became so interested in the game that they forgot all about the heat.

AGRICULTURAL NOTES.

Initiatory steps were taken at Santa Ana on Saturday last for the organiza-tion of an agricultural and horticul-tural society for Orange county.

The vine prospects are very encouraging in this section, and the inquiry is very frequent, "Where can I gag good cuttings to set out next fall?"—

C. W. Smith sold this week to Charles Labatt 20 acres of land. Mr. Labatt's two sons from Los Angeles will each take charge of 10 acres.— [Ontario Observer.

this season on his ranch at the head
of the avenue. We are now importing
all of this fruit from the North. T. B. Wilkinson is shipping half a ton of strawberries east every day, and cannot fill all his orders. Most of the berries come from Azusa and Glendora. The moral is plant strawberries, and you will make money.—[Ontario Record.

Ventura county shipped six hundred and seventy carloads of the last bean crop east. More than four hundred of these cars (each carrying ten tons) were carried over the Santa Fé lines, though they haven't a rail in Ventura county. These beans bring the producers three to five cents per pound.—[Ontario Record.

BIG STORMS IN HISTORY.

Disaster Into the Shade.

[New York Sun.]
In 944 a storm in London destroyed
1500 houses. In 1091 a storm in the
same city destroyed 500 houses. In
1696 a storm on the coast of England destroyed 200 coasters with most of their orews. One of the greatest storms ever known was that of November 26 and 27, 1703, which caused in London alone a loss of over £2,000,000. It is estimated that over 8000 people were lost in the floods of the Thames were lost in the moods of the Thames and Severn, and off the coast of Hol-land. During the same storm twelve men-of-war with eighteen hundred men on board were lost in sight of their own shore. The famous Eddytheir own shore. The famous Eddystrom the East today or tomorrow.

Messrs. Dennys and Ellis are in town canvassing for the San Francisco Examiner.

Mrs. D. E. Bittle and George de Couleft for the East yesterday. They expect to return in the fall.

Mr. Parker of the firm of Parker & Knight has gone to San Diego, where he expects to reside permanently.

John H. Dole of Pomona, cashier of the People's Bank, was in town Sunday. He returned home yesterday west coast of England and Ireland ricane at Seerat, in the East Indies. A terrible hurricane swept the west coast of England and Ireland during January 6 and 7 of 1889. Over one hundred and twenty people were killed in and near Liverpool. In Irelaid 400 houses were blown down, and there was a great loss by fire. A big storm drove 143 wrecks on the British coast May 28, 1861. On June 28, 1875, 250 persons were killed at Buda-Pesth, Hungary. In September of the same year a storm on the coast of Texas swept many villages away and caused an immense loss of life. On December 28, 1879, the Tay bridge in Sectland was blown down, and over one hundred persons were killed. Destructive tornadoes in the western part of this country caused great loss of life and property in April, 1880. The Johnstown disaster of last May in Pennsylvania is still fresh in the memories of all. Millions of dollars worth of property were destroyed, and nearly four thousand people were killed.

A New Anglomaniac.
[Terre Haute Express.]
"This is about the time of the year," was asked yesterday by the Times reporter whether any plans had as yet materialized for the construction of a railroad up the mountain. Mr. Vandevoort had nothing definite to say on the subject, but implied that a company had not yet been organized for that purpose. The general impression through town is that such a road will be built some time soon.

A Dam at Devil's Gate.

A meeting of the Pasadena Lake Vineyard Land and Water Company was held yesterday afternoon. It was decided to build a dam of sandbags at Devil's Gate, to increase the present water supply. The work will be company that purpose. The general impression through town is that such a road will be built some time soon. BUSINESS.

LETTERS TO THE TIMES.

Pennies for Street-car Fares.

Los Angeles, May 19.—[To the Editor of The Times.] There seems to me to be some strange action on the part of the horse and cable road conme to be some stange school and the part of the horse and cable road conductors in relation to accepting five pennies for a fare. I saw one rofuse to take them from a lady last week. I asked him if the superintendent instructed him not to receive pennies. His reply was that every time be took them he was out a nickel. That's all I could get out of him. I called at the office next day at Seventh street and Grand avenue. I there asked if they instructed the conductors not to take pennies. He said no, and he held up a roll that he had just put up. I have talked with conductors since; while they will not acknowledge they are instructed, yet I presume that the company pays the conductors in pennies who take them, and they say they can't do anything with them. This I deny, for I have not yet found the store in Los Angeles that will refuse to take them. There ought to be some understanding in this matter. It won't be long before pennies will come into general use in this city. Yours truly,

Aphistic Encounter. Los Angeles, May 18.—[To the Editor of The Times.] I notice by today's Times that Mr. Lelong made 'an important discovery" in Washington, D.C., that the aphis was being ington, D. a., that the aphis was being destroyed by the lady-bugs, and he had sent large colonies of the lady-bugs to San Gabriel and Sacramento. I made the same "discovery" last week. The apple trees in my yard were badly inflicted by the aphis. A few days ago I found the lady-bug in large numbers, eagerly devouring the aphis. Today the trees are entirely free from the pest. Yours truly.

Probably no system of practice ever employed has been so universally successful as that introduced by Dr. Williams for the cure of Cata rb. Throat Diseases, Bronch tis, Asthma and Consumption.

CATARRH.

CATARRH.

Catarrh is often regarded by the patient as a cold in the head, and he often expresses his astonishment at his remarkable tendence to contract fresh cold. Indeed, he declares that he is scarciely free from one cold before he takes another, and he is always exceedingly careful; it is also a mater of surprise to him that the cold always seems to settle in the head and shroat.

At times many of the symptoms of catarrh seem to abate, and the patient is led to hepe that the disease is about to wear off; but another class of symitoms soon appear and belearns to he shorror that, instead of recovery from the disease, it is somewhate changed in
